

ISLE OF SKYE

WILDERNESS & WILDLIFE EXPEDITION

16th – 19th April 2020

Rugged countryside, unspoilt beaches and striking mountain ranges, Skye is a prime destination for adventurers and nature lovers alike.

Highlights include guided hikes, a boat safari to search the famously elusive otters and other wildlife including minke whales and dolphins, and wild camping under the stars.

Follow in our Co-Founder, Virginia McKenna OBE's, footsteps to celebrate the 50 years since she starred in the film *Ring of Bright Water*, based on the story of an otter, Mij, and his relocation to the remote Isles.

To this day, Skye remains close to Virginia's heart:

"This promises to be, I'm sure, a very special weekend – a wildlife experience like no other. Looking for otters and many other species of wildlife that are to be found on the west coast. It will be a very wonderful and personal adventure that will bring the atmosphere, the beauty and a very special memory of one man's relationship with animals into the hearts and minds of all who go."
