Herbivores, Carnivores and Omnivores

All animals need to eat food to have enough energy to grow and have babies. We class animals into three groups depending on what type of food they eat:

- **Herbivores** eat plants
- **Carnivores** eat other animals
- **Omnivores** eat both plants and other animals.

**Your Task:** Carefully cut out all of the animals found on the next page. Next, stick each animal into the correct section of the Venn diagram, depending on what food it likes to eat. Remember to be careful when using scissors – you might need an adult to help you.

**Star Challenge**
Can you add any more animals by drawing them into the correct section of the Venn diagram? How many different herbivores, carnivores and omnivores can you think of?
**Pangolin**
I eat termites and ants

**Lion**
I eat antelopes and zebra

**Elephant**
I eat leaves, grass and bark

**Hippo**
I eat grass

**Cheetah**
I eat small antelopes and hares

**Brown Bear**
I eat fish and berries

**Leopard**
I eat antelopes and monkeys

**Orangutan**
I eat fruits and leaves

**Spotted Hyena**
I eat wildebeest and antelope

**Moon Bear**
I eat berries, leaves and insects

**Black Rhino**
I eat leaves and woody twigs

**Bottlenose Dolphin**
I eat fish

**Vervet Monkey**
I eat leaves, flowers and insects

**Tiger**
I eat deer and wild pigs
